

Sphere Medical Presenting at Nano4Life

19 January 2009: Stuart Hendry, CEO at Sphere Medical Ltd will join leading representatives from nanotechnology and lifesciences deliver a keynote presentation at Nano4Life 2009. This one-day conference and exhibition, taking place in London on February 11th, will explore the key areas within the life sciences, where nanotechnology offers the most opportunity to advance healthcare provision, improve product discovery and development and keep the UK a leading force in this exciting technology area.

Nano4Life aims to provide an opportunity to showcase nanotechnology to the basic science community and provides an environment to catalyse new collaborations. The conference will hear from leading figures in the field from industry and academia, including GlaxoSmithKline, AstraZeneca, Imperial College, University of Glasgow and the London Centre for Nanotechnology. Further information and a full list of speakers and presentation titles is available at www.nanoktn.com

About Sphere Medical

Sphere Medical is developing highly innovative monitoring products to provide clinical and economic benefits in the critical care environment, based on the company's proprietary microsensor technology. The products allow minimally invasive, real time measurement of clinical chemistry parameters and therapeutic drug concentrations, giving healthcare professionals the information they require to more effectively manage therapy and optimise patient outcomes. Sphere Medical is a private company, founded in 2002 and based in Cambridge, UK.
